

As a leader, I take on my role with courage to persevere as a **successful and accountable example to my team members**. My **love of learning** and growing provides me with the wisdom to continue evolving and adapting to my team's and my client's needs. My weakness as a leader continues to be remembering to take care of myself as I so often put others first. I will put forth more effort in progressing in this area as this quality is essential to being a strong and well rounded leader. **I pride myself in providing a high quality of work while expanding my personal development and nurturing my newest team members.**

As a leader I would like to use my strengths of **Hope, Leading and Love of Learning** to continuously build a culture within BG in which life long learning and being better is engrained in all employees, leaders and stakeholders.

As a leader, I am motivated to use my strengths of **originality, critical thinking,** and **fairness** to foster an environment where **every team member I encounter feels empowered and engaged, has a sense of belonging, and is motivated to be his or her best self.**

To grow with my clients and nourish/coach my team to help them meet individual goals within the company.

I want to live and lead each day the same way, looking for opportunities to excel personally and to encourage and strengthen others around me. I want to **find joy and challenge in each day to learn and grow continuously** and **lead by example at all times** and most of all to display humility in it all....

As a leader I strive to use my strengths to empower my team to perform to the best of their abilities while also helping them learn their strengths and grow into their best qualities. I use my strength of **Perspective** to be a sounding board for my direct reports and to help them see their job as more than just "the next job or work order". I use my strength of **Teamwork** to help my team accomplish everything that is set before us, where one person might come up a bit short another is there to help pick them up. We work as one cohesive unit and always have each other's backs.

As a leader I want to encourage and support my team. Use my strengths to **help them solve problems and engage them to stay connected and lean on one another with trust and reliability**. Help them be **confident in the choices they make.**

As a leader I will constantly strive to be the best version of myself to allow stronger growth opportunities professionally and personally. Always lead by example with a positive attitude and outlook.

With the new way that our work force looks current day I **strive to unite my creativity & humor** to incorporate positive synergy within our unit.

As a leader, I want to **provide recognition to my peers when they are doing well, all while being tolerant for any shortcomings they may have, all while showing my wisdom on how to improve!**

Focus on accepting others shortcomings and **letting their accomplishments outweigh those things that need coaching**. Make sure that I do this in a caring way and choose my words carefully so they aren't so fact only based. It will require me to have **more self control and awareness of my feelings and words before I address the topic.**

...I want to **help others to see the good in themselves**, to feel accomplished and empowered in whatever small way I can.
